

## E-Newsletter Vol 2008-12

### **CenTrax Version 9.0 – Webinar Update**

I am offering a second opportunity to attend a webinar that will help you become familiar with the changes included in CenTrax Version 9.0. This class will be offered on Monday, November 10, from 1-3 pm, Central Time. To register, click [here](#). This class is offered FREE of charge.

If you are registered for the class on October 24 but would like to change to the November 10 session, check the bottom of your invitation and you can cancel your registration (it is small but it is there) and re-register for the new class.

### **User Guides**

Updates to the User Guide will be made available the week of October 27. I will send an email that week to provide you with delivery options.

### **Changes to HMDA**

We are aware of the change that was recently announced regarding the calculation and reporting of rate spread for HMDA. Our programmers are planning the necessary enhancements. Additionally, the FFIEC announced the release of the 2009 edits for HMDA data collection. An upgrade will be made available to ensure your compliance with the new rules in 2009. Watch future newsletters for more information regarding these changes and the availability of the enhanced software.
